PROFILE

While continuing my Computer Programming education at Izmir University of Economics, I am specializing in object-oriented programming and database architectures. I have strengthened my technical problem-solving skills through projects developed in Java, Python and C#. I am focused on delivering end-to-end solutions in modern web technologies and SQL-based systems.

PROJECTS

SQL-Based Login/Register System

C# MySQL MSSQL

A system handling user registration and authentication, covering database security and CRUD operations.

Dues Management System

React TypeScript Tailwind CSS Vite shadcn/ui

Web application for tracking and managing apartment dues. Built with modern UI components and a type-safe codebase.

Todo List Application

React TypeScript Vite

SPA featuring task creation, editing, completion and deletion. State management with React hooks and responsive design.

COMPETENCIES

- Algorithmic Thinking & Problem Solving
- Responsible & Result-Oriented Work Ethic
- Teamwork & Quick Adaptation
